** Please make sure you abide by your employer's Social Media Policy and consider any recommendations they may have for your LinkedIn Profile or your participation on LinkedIn...

Highly recommend that you FOLLOW the company profiles of enterprises where you may like to work in the future

9. Group choices

Groups can be a great way to be kept up to date with trends and information and keep you posted on events and activities associated with your interests.

Choose groups that have a reasonable number of members and are well moderated. Also make sure that you do not spam or sell in these groups. You can adjust your notification settings at

https://www.linkedin.com/notifications/settings/group/urn:li:fs_notification_setting_group:GROUP_UPDATES/ Quality and influence varies greatly – not always a great first choice...

10. Job Search Strategies

Turn on your Career Interests – via the Jobs tab on the top of your screen – include a message to recruiters about the type of work you are looking for and add in as much information about the job titles, employment type (contract, temporary, remote etc), locations, industries etc at <https://www.linkedin.com/in/sueellson/opportunities/job-opportunities/onboarding/>

Turn on Job Alerts – LinkedIn has recently expanded this feature and there are a lot more choices you can make, even targeting specific companies. Remember that applying quickly helps, but personalising your application is just as important. If you are re-directed to the company website, make sure your resume is Applicant Tracking System ready and if applying through LinkedIn, attach an 'application' document that has a tailored cover letter and resume / CV in one document – your application needs to match the job description to secure an interview <https://www.linkedin.com/jobs/search>

Follow your target companies – particularly if they are large companies that may have a LinkedIn Recruiter subscription. If you are already following them, you are more likely to appear in LinkedIn Recruiter searches. Whilst you are at it, see if the company has a 'Careers' page on LinkedIn and check that out too. You may also like to have a look at the Company's website and see if they have a Career's section and register directly (as some employers only use direct applicants)

Reach out directly to people – decision makers in enterprises are unlikely to have time for generic career enquiries and rote emails or Inmails from people sending a blanket message to multiple companies. One of the most successful ways to secure employment is by referral. So you need to find people who may be willing to refer you to someone within the enterprise. This means that you need to do a lot of research first. You need to find out how the company operates and be fully aware of their presence in the marketplace, what they do and how they work. You need to find out who works there and if you have any LinkedIn connections in common.

If you do this research, you may like to reach out to some of these people with a personal message and ask for information about the recruitment process (not a job just yet). Once you have this information, you will hopefully be able to keep finding out more information and start networking until you receive a referral. Organising a quick five minute telephone discussion is much more efficient than a personal meeting. If the first person says no, try again. Make sure you are 'application ready' and have a resume / CV partly prepared.

If you are currently unemployed or studying full time – make sure you create a current position. Fill it in with information about the type of work you are seeking in the title and in the employer section, mention 'Various' for now. You can discuss how you are currently doing research, networking, studying, applying for jobs in which areas etc. Please do not use the words 'seeking opportunities' or any variation of it! This makes you look desperate. You are more likely to appear in search results if you are currently 'working.'

Avoid mentioning years of experience – By completing the dates of your employment, your years of experience are automatically created. You want to avoid any language that people could use to say 'no' to you. For example, you could say you have 'three years of experience' but the person reviewing LinkedIn profiles may want five years of experience.

Your goal is to encourage the viewer of your profile to keep reading until the very end with as much useful information as possible that relates to the type of work you are seeking.

Talk about your achievements in a language that is appropriate for the location of the job – the way you describe achievements in the USA is very different to Australia. However, it is essential to include them as most recruiters and decision makers are taught that 'past behaviour is a predictor of future performance.' If you have achieved X at Y company, then in theory, you would also be able to achieve X at Z company. Again, include your keywords for your job and industry so that you are more likely to appear in search results.

Remember that if you optimize your LinkedIn Profile, it can often appear number one, page one of Google search results for your name, your keywords and for your Article titles – so it is worth getting it RIGHT for your purpose.

11. Content and Attraction Marketing Strategies

First and foremost, you need to complete your own LinkedIn Profile to the best of your ability.

You can then start by engaging with content and moving to curation (selecting other people's content to share) and then creating content.

Articles can be Search Engine Optimised to appear in Google Search Results long after the original publication date and are best suited to 'evergreen' content

Google search 'tough love unemployed' for an example or 'LinkedIn for authors'

<https://www.linkedin.com/pulse/tough-love-unemployed-job-seekers-under-30-years-age-sue-ellson>

<https://www.linkedin.com/pulse/linkedin-authors-writers-playwrights-script-ghost-literary-sue-ellson>

<https://www.linkedin.com/pulse/how-write-search-engine-optimised-article-linkedin-sue-ellson>

Note to self: Always keep a copy the content of your Post or Article, the date and the URL as there is no guarantee that it will always be online (perhaps in an Excel Spreadsheet). Do not use copyright images. All images must have written permission to be used. Free images can

be sourced at <https://www.pexels.com>. You may like to post your link at <https://archive.org/web> for a permanent record to remain on the internet

Remember to keep your Engagement Ratio at a good level – ideally one share of your content and 12 engagements (Like, Comments or Shares of other people's content – again, be strategic).

Consider sharing some of your Post URLs to others to encourage them to interact with your Post via an EDM (Electronic Direct Message - direct email to selected people).

12. Research, Referrals and Sales

Sales Process – do not spam, advertise only once you have existing results
<https://www.linkedin.com/pulse/how-generate-leads-sales-results-linkedin-sue-ellson>

LinkedIn is an excellent research tool that helps you find people beyond your first and second level Connections. You can search at <https://www.linkedin.com/search/results/index> and if you go beyond the Commercial Use limit, you can use an Advanced Google Search https://www.google.com.au/advanced_search and include LinkedIn.com in the site or domain field.

13. Video

Personally believe all good video should be added (and optimised) on YouTube for permanent digital asset value). When you upload it to YouTube, you can request closed captions, update the text and then download an .srt file so that when you add the 'native' video to LinkedIn, captions can also appear (for the newsfeed only).

Native video autoplays on both mobile and desktop, and is 5x more likely than other types of content to start a conversation among members

Pro-tips:

Keep it short: Aim for 1-2 minutes and be sure to capture attention with the first few seconds. Avoid lengthy opening sequences. Many users will be watching with the sound off, so if you add captions or graphics, it can help the viewer follow along.
