

LETS LOOK AT
YOUR FIRST
6 MONTHS
WITH
GradWISE

Here is what your first six months at GradWISE would look like:

Initial meeting: Introduction to the GradWISE program and meeting your consultant.

Employability audit: Creating an individually tailored plan to allow the student/graduate to map their dream in reverse. Within this audit the Career Consultant will create a competitive CV and start to map the road to success.

GradWISE masterclass: Monthly GradWISE masterclasses introduce our students/graduate to industry experts, the graduate application process, interview techniques and a range of different topics to help them on their employment journey.

GradWISE live: Creating a safe space and community to build social safety for our students/graduates where they can share their collective experiences and feel supported.

Peer support: Connecting our students/graduates with former GradWISE members who have completed the program and have been in employment for 6-12 months.

NeuroZone coaching: Brain and body optimisation coaching working on the 10 foundational drivers to help our students and graduates thrive within every aspect of their lives.

Mentorship: Linking our students/graduates with a mentor within their desired field to help them navigate the workplace.

Internship: Linking our students/graduates into supported work place environments to ensure they have the skill set, confidence and knowledge to be able to thrive within the work environment.

Shadow day: Introducing our students/graduates to supportive employers where they are able to obtain different workplace experiences and build their CV and knowledge of different industries.

Graduate application: Graduate applications are open every six months - by this stage our students/graduates will have the confidence, experience and exposure to industry to be able to excel in the application process.
